

Sinara and ARTIQ - towards the open-source scientific instrumentation

Mikołaj Sowiński
(Technosystem – PW)

Faculty of Physics, Thursday 29th of February 2024, 12:15 lecture room 111

This talk introduces the concept of open-source scientific instrumentation, exploring its benefits and challenges for various research communities. We will give Sinara open-hardware ecosystem as a prime example, highlighting its functionalities alongside the ARTIQ open-source control system. Practical applications and use cases will be presented, followed by a discussion on the business landscape surrounding the commercialization of open-source scientific instruments. [Teams link](#)
